### Cockroaches

Cockroaches are filthy pests. They can spread diseases, contaminate our food, and cause serious allergies, including asthma. Cockroaches pick up germs on their legs and bodies as they crawl through decaying matter or sewage and then transfer these germs to food or onto food surfaces.

Roaches are most common in warm, humid environments. Several species share habitat and food with humans. Nocturnal, they generally hide out of sight in cracks and crevices near food and water sources. Appearance of roaches during the daytime can be a sign of a serious infestation. Roaches are born scavengers and are especially fond of starchy foods such as cereals. They are also known to consume leather, paper, fabric and decaying organic material.

Roaches emit a foul odor due to the fluids secreted by scent glands and later regurgitated while eating. Some species of roaches are breeders and very protective of their offspring, so they deposit eggs no more than 24 hours before they hatch.

Treatment for Roaches: Consist of a series of 4 treatments

#### SCHEDULE

- CLEAN OUT
- FOLLOW-UP #1- TWO WEEKS AFTER THE INITIAL CLEAN-OUT
- FOLLOW-UP #2- ONE MONTH AFTER FOLLOW-UP #1
- FOLLOW-UP #3- ONE MONTH AFTER FOLLOW-UP #2

#### ROACH CLEAN OUT

ALL OCCUPANTS OF THE HOME MUST BE OUT OF THE HOUSE/APT FOR 2-4 HOURS AFTER FIRST SPRAY. AFTER THAT IT IS OKAY TO RETURN AND PUT ITEMS BACK IN THEIR PLACE.

### **CHECK LIST OF THINGS TO GET READY**

- COMPLETELY EMPTY OUT ALL KITCHEN CUPBOARDS. (PLACE THESE ITEMS ON THE TABLE)
- COMPLETELY EMPTY ALL KITCHEN DRAWERS, PLACE ITEMS ON TABLE. (YOU CAN COVER WITH A SHEET OR TABLE CLOTH IF DESIRED)
- CLEAN OFF ALL COUNTERTOPS SO THERE IS **NOTHING ON THEM**
- PULL STOVE AND REFRIDGERATOR AWAY FROM WALL (WE WILL SPRAY BEHIND THEM; THIS IS A MAIN HIDING PLACE)
- MOVE ALL THINGS AWAY FROM WALLS THROUGHOUT THE ENIRE HOME/APT
- REMOVE ALL THINGS FROM STORAGE CLOSETS AND PLACE IN MIDDLE OF ROOM
- REMOVE ALL ITEMS FROM CABINETS UNDER SINKS (IN KITCHEN AND BATHROOMS)

ONCE THE CHEMICAL IS DRY (2-4 HOURS), IT IS OKAY TO PUT NEWSPAPER DOW IN THE CUPBOARDS AND DRAWERS AND RETURN ITEMS TO WHERE THEY GO. **DO NOT WASH CHEMICAL OFF!!!**

### **CHECK LIST FOR FOLLOW-UPS**

ONLY THESE ITEMS NEED TO BE DONE FOR THE FOLLOW UP APPOINTMENTS

- PULL STOVE AND REFRIDGERATOR AWAY FROM WALL
- MOVE ALL ITEMS AWAY FROM WALLS

\*\*Leave chemical on as long as possible. Do no clean immediately after a spraying. It is important that the spray residue stays in place so that it can continue to fight infestation.
